COURSE-IN-A-BOX · INSTRUCTOR LICENSE

Teach Advanced ML — Without Building It Yourself

A ready-to-deliver course for learners who already build scikit-learn pipelines: explaining models and fairness, clustering and anomalies, dimensionality reduction, deep learning with PyTorch, text, recommendations and MLOps, all on one company's data, ending in a capstone with a model card.

13	23	39	156
3-HOUR SESSIONS	LESSONS	CLASS HOURS	SELF-CHECK ITEMS + KEYS

WHAT YOU GET

FOR EVERY SESSION (×13)

- **Facilitator guide**: a 0:00–3:00 agenda, scripted live demos with real output, the mistakes to expect, what to cut if you run long
- **Participant workbook**: key ideas, worked examples, predict-then-run items, a 12-item self-check
- **Answer key**: every item explained, including why each wrong option is wrong
- **Slide deck** and **labs**: new starter and solution programs on the course data

ACROSS THE KIT

- Combined, print-ready books: **Facilitator Guide**, **Participant Workbook**, **Answer Key**
- **Slide decks** (401 slides) and **runnable labs** (50 starter/solution pairs, 18 find-the-bug handouts), verified by a one-command checker that runs offline
- **Checkpoint 1** (Session 6), a two-session **capstone** with five problems and a **final assessment** rubric, a **setup guide** and a public **syllabus**

WHY INSTRUCTORS CHOOSE IT

- **Pairs with Machine Learning Foundations.** The companion kit (11 sessions) teaches the supervised core; this one picks up where it ends: 24 sessions, 72 hours together, or each on its own.
- **One dataset, start to finish.** Pinecrest Outfitters, a fictional retailer: churn, demand, fraud, reviews, purchases, store sales; Fashion-MNIST and EuroSAT for images.
- **Deep learning on a laptop CPU.** Every lab runs in under 90 seconds, slow steps ship as small fixtures, and each deep-learning session has a CPU-time plan. No GPU.
- **Honest ML.** Baselines first, the test set opened once, fairness and drift checks, negative results reported as results.
- **For** trainers, bootcamps, colleges and CE, corporate L&D and workforce programs; weekly, twice weekly or intensive.

LICENSE & PRICING

SOLO

[$1,497] one-time

One instructor · unlimited students · print the workbook for your class

ORGANIZATION · MOST POPULAR

[$4,997] one-time

Everything in Solo · unlimited instructors at one organization

WHITE-LABEL

[$9,997] one-time

Everything in Organization · your branding · edit and adapt

Optional updates subscription [$299/yr]. The Pinecrest dataset is licensed with the kit; public image data and pretrained weights download from their sources under their own terms (`LICENSE.md`). Ask for a sample session: rays-home.netlify.app/contact.
